

REMARKS

The application was filed with claims 1-12 which are still pending.

The office action, through inadvertence and mistake shows that Figs. 23 and 34, instead of Figs. 23 and 24, are in the application. This was confirmed by a telephone call to the Examiner.

The Examiner requires restriction to the claims directed to Embodiments 1 or 2. All of the claims in the application are directed toward a test button independently attached to a mounting strap and, therefore, are related. As stated in 808.02 of the MPEP, ...“Where, as disclosed in the application, the several inventions claimed are related, and such related inventions are nor patentably distinct as claimed, restriction under 35 U.S.C. 121 is never Proper (MPEP 806.05)”.

In view of the interdependency of the claimed inventions, it is respectfully requested that the restriction requirement be withdrawn as to the claims and each of the claims presently pending in the application be examined.

The Commissioner is hereby authorized to charge any fees which may be required for the amendment, or credit any overpayment to Deposit Account No. 50-1561 of Greenberg Traurig, LLP.

As an extension of time is required to make this Amendment timely filed, the Commissioner is requested to grant a petition for that extension of time which is required to make this response timely and is hereby authorized to charge any fee for such an

extension of time or credit an overpayment for an extension of time to Deposit Account

No. 50-1561 of Greenberg Traurig, LLP.

Respectfully submitted
